November 2023

On Tuesday, 28 November, the 3rd annual Benefit Concert of the Faculty of Medicine and the Faculty of Pharmacy in Hradec Králové, organized by the Association of Medical Students and the Association of Czech Students of Pharmacy, in cooperation with both faculties, took place at the Petrof Gallery. Petrof Gallery.

The students once again combined an evening of music with a good deed and an effort to help where the need is. All proceeds from this autumn event went directly to the family of little boy Bertík, who suffers from a congenital spinal cord defect and deformity of the thoracic vertebrae.

Medical and Pharmacy students performed a wide range of pieces on the theme of Back in Time, introducing visitors to the evolution of music up to the present day.

The event also included refreshments, where everyone could enjoy good wine, nibble on something sweet/salty to eat, chat with friends or look around the beautiful Petrof Gallery. All proceeds from the food and drink also went to a good cause.

The event raised a total of CZK 102 948, which the Bertík family will use to finance intensive rehabilitation stays, special therapies and aids that are unfortunately not fully covered by health insurance.

Many thanks to all participants and we look forward to seeing everyone again!

March 2023

On the evening of 21 March 2023, the 2nd benefit concert of the Faculty of Medicine in Hradec Králové took place in the Petrof Gallery in Hradec Králové, which this year was held for the first time in cooperation with the Faculty of Pharmacy in Hradec Králové.

The concert was organized by the Association of Medical Students and the Association of Czech Students of Pharmacy. Its main goal was to help little Davídek, who is fighting a brain tumour.

The concert met with great interest, the capacity of the hall was completely sold out and a total of 440 people gathered in the hall. The Petrof Gallery premises added to the perfect atmosphere of the event. The quality of sound and lighting gave the whole performance a professional touch, which was certainly appreciated by the visitors.

The musical theme of the concert was film music and a total of 36 musicians took turns on stage. Their performances were perfectly prepared and they were able to play beautiful songs that recalled unforgettable movie moments.

All the proceeds from the concert, which amounted to CZK 92,486, were donated to support little Davídek. The organizers of the concert are happy that they managed to organize such a beautiful and successful event that brought joy not only to the performers, but also to the audience and to little Davídek and his family.

The parents will use the money to buy special dermocosmetics from the pharmacy, which helps to alleviate the symptoms of biological treatment, to arrange hipporehabilitation, because Davídek loves animals, and possibly part of the proceeds as a contribution to a car, so that Davídek can go from the kindergarten with his mother by car and do not have to use public transport, because Davídek has weakened immunity and is very susceptible to diseases.

In conclusion, the Faculty of Medicine and the Faculty of Pharmacy of Charles University in Hradec Kralove are proud of their students and their willingness to help others. We look forward to further cooperation.

November 2021

The traditional Student Concert of the Faculty of Medicine in Hradec Králové took place on Monday, 22 November 2021 at 7 p.m. in the Hradec Králové Philharmonic Hall.

This year, the concert, which commemorated the anniversary of 17 November, was conceived by the students as a fundraising event. They decided to donate the proceeds from the ticket sales to the treatment of two and a half-year-old Natálka, who suffered from cerebral palsy. During the evening, a total of 23 pieces of classical music as well as jazz, swing, pop and rock music were performed by 25 musicians from the students of the Faculty of Medicine.

The proceeds from the concert, which amounted to CZK 20,560, were given to Natálka's family, who will use them for special rehabilitation exercises and other therapies.
