

Charles University, Faculty of Medicine in Hradec Králové

Dean's measure No. 19/2020

Ref. UKLFHK/462945/2020

Title: **Provision of Personal Protective Equipment, Detergents, Cleaning Agents and Disinfectants**

Validity and effectiveness: on the day of the Dean's signature

Article 1
Initial Provisions

This measure determines the provision of personal protective equipment (hereinafter 'PPE'), detergents, cleaning agents, and disinfectants in the specific conditions of the departments of the Faculty of Medicine in Hradec Králové (hereinafter also the 'LF HK') in accordance with Act No. 262/2006 Coll., Labour Code, as amended, Government Regulation No. 495/2001 Coll., laying down the scope and conditions for the provision of personal protective equipment, detergents, cleaning agents and disinfectants, as amended, and Regulation (EU) 2016/425 of the European Parliament and of the Council of 9 March 2016 on personal protective equipment and repealing Council Directive 89/686/EEC and other relevant and successor regulations.

Article 2
Purpose

The purpose of this Measure is the provision of personal protective equipment, based on a risk assessment and specific working conditions to ensure personal protection at work of the staff at the Faculty of Medicine in Hradec Králové and of other persons operating with knowledge of the LF HK at its workplaces (Article 5, hereinafter referred to as 'authorized persons') and the determination of responsibility, scope, and conditions for the provision of PPE and detergents, cleaning agents, and disinfectants.

Article 3
Scope of Validity

1. This regulation is binding for all employees of the Faculty of Medicine in Hradec Králové and also applies to other authorized persons who carry out activities for the LF HK and activities within the scope of its competence and designation at its workplaces.
2. This Measure does not provide for the provision of PPE to students during the teaching of clinical subjects at the workplaces of the University Hospital Hradec Králové (hereinafter 'the FN HK').

Article 4

Personal Protective Equipment (PPE) and the Conditions under Which It Is Provided

1. If it is not possible to eliminate the risks of the work activity or to reduce them sufficiently by the means of collective protection or measures in the field of organization of work, the LF HK shall provide staff and other authorized persons with PPE.
2. PPE is personal protective equipment which meets the requirements laid down in the directly applicable European Union Regulation on protective equipment and which is designed to protect employees and other authorized persons from risks which could endanger their life, safety, or health at work.
3. PPE
 - a) must protect against risks, and its use must not present any additional risk,
 - b) must not endanger the health of persons and must not impede the performance of work,
 - c) must be adapted to the physical conditions of the person using it and to their state of health,
 - d) must comply with existing workplace conditions.
4. When PPE is used by multiple people (e.g., frost-resistant gloves, face shields, safety goggles for students), PPE must be disinfected after each use.
5. When using multiple PPE at the same time, these PPE must be compatible with each other.
6. In an environment in which clothing or footwear is subject to extreme wear or contamination during work or performs a protective function, the LF HK also provides work clothing or footwear as personal protective equipment. Work clothing and footwear provided for other reasons (e.g., representation of the LF HK), as well as apparel and equipment used during road transport, are not considered PPE and are not provided under this Measure.
7. The LF HK provides PPE based on an assessment of specific risks and specific conditions of work.
8. The LF HK provides PPE free of charge and must not substitute this obligation by financial transactions.
9. The LF HK provides maintenance (unless otherwise specified in this Measure) and a check of the condition and use of the PPE.
10. The PPE is the property of the LF HK.
11. The employees and other authorized persons shall use the PPE assigned only at the LF HK workplaces and only for the purposes for which it is intended. A breach of this obligation shall be considered as a breach of the employees' duties or a disciplinary offense.

Article 5

Provision of PPE to Employees and Other Authorized Persons

1. The LF HK shall provide PPE to employees in an employment relationship, to employees working under contracts for work outside of the employment relationship, and to other authorized persons before any work or activity is carried out.

2. If, in the case of multiple concurrent positions of one employee or another authorized person, the same PPE is established for those positions, the LF HK shall provide the PPE only once to the employee or other authorized person.
3. The LF HK also provides PPE to students in the quantity and extent necessary for teaching and practical seminars, except for work clothing and footwear. PPE selection is determined by the supervisor of the practical seminars.

Article 6

Responsibility

Responsibility for the identification of risks at the workplace, the submission of applications for PPE, the provision of PPE, its maintenance in usable condition, cleaning, washing and disinfection, the recording and control of PPE use and for familiarizing employees and other authorized persons with instructions on the use of the PPE, guidance on its use, method of storage, maintenance and time of use, and risks the PPE protects from, lies with heads of institutes, clinics, departments, Dean's Office, and other parts of the LF HK (hereinafter 'the head of department'). The head of department may delegate the individual activities to another employee (hereinafter the 'employee responsible').

Article 7

Determination of PPE Needed

1. The determination and allocation of PPE to employees and other authorized persons shall be carried out by the head of department or the employee responsible on the basis of a work risk assessment.
2. The head of department or employee responsible, in cooperation with the EH&S technician, will perform risk assessment of the given workplace based on the Risk Assessment Table for the Selection and Use of PPE and determine the necessary PPE for the workplace to protect people from hazards during work (Annex 1 The Determined PEE for Each Workplace).
3. In the event of changes at the workplace that affect the safety and health of persons, the creation or risk of new hazards, or other changes (e.g., new technology, new job), the head of the department or the employee responsible informs the EH&S technician of the new facts, and they will work together to evaluate the risks and determine the necessary PPE. The EH&S technician will prepare the exceptional determination of the PPE, which they will forward for approval to the Secretary of the LF HK. After approval of the exceptional determination of PPE, the PPE will be issued to the department.

Article 8

Purchase and Issue of PPE

1. The purchase of the necessary PPE is carried out by the Operational and Technical Department (PTO) in cooperation with the EH&S technician, who checks the suitability of the PPE purchased and the fulfilment of the legislative requirements set for the PPE.
2. The issue of PPE per site is done by the PTO upon Application for the Issue of PPE, signed by the

head of department or the employee responsible. Prior to the issue of PPE, the EH&S technician checks the application for compliance with department-specific PPE.

3. The PTO shall ensure that PPE is stored and kept in appropriate areas prior to its provision so that its protective function is not impaired or reduced and is available in sufficient quantities to meet the needs of the workplace.

Article 9 Recording of PPE Provision

1. The records of the PPE issued are kept at each workplace on the PPE Issue and Return Cards. In the case of a previously established other written form of PPE recording at the workplace, this record may be continued only if it fulfils all the requirements of the PPE Issue and Return Card, or the workplace may implement a (recommended) unified method of recording PPE at the LF HK.
2. The employee shall always confirm by their signature on the PPE Issue and Return Card, or any other equivalent record according to paragraph 1, that they have received the PPE at the workplace and, where appropriate, acknowledge where the PPE is stored for their use as required (e.g., disposable gloves). They also certify by this signature that they are familiar with the instructions at the workplace, have been instructed how to use the PPE, including the manner in which PPE is kept, maintained and used, and informed of the risks that PPE protects them from.

Article 10 PPE Washing and Maintenance

1. Employees and authorized persons shall exercise sufficient PPE hygiene standards and maintenance, and timely washing and cleaning (unless otherwise provided for in this Measure).
2. The washing and cleaning of work clothing and towels is arranged, for employees and other authorized persons, by the workplace Vivarium via the FN HK laundry.
3. The employee (or other authorized person) must appropriately label their workwear (e.g., by stitching the initials of their first and last name and the name of the workplace).
4. The receipt of dirty laundry and the issuing of clean laundry are carried out by the authorized Vivarium employees, always in bulk for each entire LF HK department, on a specified working day, at a frequency of once per 14 days, at a collection point in the specified working area of the Vivarium.
5. Workwear contaminated by antineoplastic agents is subject to a special regime. Immediately after the completion of the work with antineoplastic agents, the user is required to store such clothing at the workplace in a black PE bag which they will firmly bind and to which they will attach a label stating the inserted laundry. The sealed PE bag remains stored at the workplace until the collection date (handover to Vivarium). The contents of the bag and the record of inserted laundry can be supplemented.
6. On the day of the collection of dirty laundry, the sealed and labelled PE bags are handed over with the other laundry at a collection point at the Vivarium, where they are stored separately in a black

cloth bag for transport to the HK FN. The number of laundry pieces contaminated by antineoplastic agents shall be recorded separately in the list of laundry handed over to the FN HK.

Article 11

PPE Replacement and Return

1. To allow for the optimizing of PPE stock, approximate time limits for the exchange of PPE are set. However, PPE must always be replaced when its protective function is impaired by wear or damage.
2. At each change, the employee (authorized person) is obliged to return worn or damaged PPE to the PTO, where, upon Application for the Issue of PPE or Confirmation of the Disposal Commission, they will receive other PPE in exchange. The replacement shall be signed by the employee (authorized person) at the workplace in the PPE Issue and Return Card or other equivalent record.
3. In the event of a proven loss, wilful damage, unauthorized use, reckless handling, or failure to return PPE, the employee (authorized person) is obliged to compensate the LF HK for the damage corresponding to the residual value of the PPE. This does not apply to cases where it is proven that the occurred loss or other damage is not due to the fault of the employee or the authorized person.
4. At the end of the work relationship with the LF HK or the work for the LF HK, employees and other authorized persons are obliged to return the PPE belonging to the LF HK to the PTO in a condition corresponding to proportionate wear and tear. Work footwear is non-returnable. In this case, the LF HK shall be entitled to claim compensation from the employee or other authorized person in the amount of the residual value of the work footwear at the date of termination of the user's relationship with the LF HK. In the event of termination of the employee's employment relationship during the probationary period or the user's activity at a comparable time, the employee (or other authorized person) is obliged to reimburse for the full value of the work footwear.
5. The residual value of the PPE referred to in paragraph 3 or of the work footwear referred to in paragraph 4 shall be determined by the Economic Division taking into account the period of use and the normal depreciation of value (amortization).
6. Returns of PPE are recorded at the workplace in the PPE Issue and Return Card or another equivalent record. The returns of PPE will be confirmed by the signature of the head of the department or responsible employee in the records.
7. The state of the returned PPE will be assessed by the Disposal Commission. If, due to the wear, the returned PPE is no longer able to fulfil its function, it will be discarded.

Article 12

Provision of Detergents, Cleaning Agents and Disinfectants

1. For employees (authorized persons) who come into contact with substances that may cause skin irritation or contamination, i.e., depending on the activity carried out, the LF HK provides detergents and cleaning agents – soap, liquid soap, washing emulsions, cleaning pastes.

2. In order to prevent the development and spread of infectious diseases connected to work activity or presence at the LF HK premises, the LF provides disinfectants to individuals at its workplaces. Protective ointments and other agents with a disinfectant effect are also considered disinfectants.
3. The number of detergents, cleaning agents, and disinfectants is listed in the document Provision of Detergents, Cleaning Agents and Disinfectants.
4. Provision of detergents, cleaning agents and disinfectants is also carried out through installed and regularly replenished soap, washing emulsions and cleaning paste dispensers, placed at sanitary facilities and other designated locations at the LF HK premises.
5. Provision of protective ointments with disinfectant effect and disinfectants is also carried out through installed and free, regularly replenished dispensers, located at sanitary facilities and other designated locations at the LF HK premises.
6. The provision of towels for all kinds of work is also carried out through the provided and regularly refilled disposable hand towel dispensers placed at sanitary facilities and other designated locations at the LF HK premises.
7. According to individual requirements, some workplaces may be provided with cloth towels, with a minimum of two towels per year.
8. The issuing of detergents, cleaning agents and disinfectants is carried out according to the requirements and needs of the workplaces and recorded by the PTO.

Article 13 **Final Provisions**

1. Annex 1 to this Measure is The Determined PPE for Each Workplace.
2. Other referenced forms and documents are listed and available on the Faculty website, in the forms and methodologies section of the Operational and Technical Department.
3. The Dean's measure No. 14/2016-2017 Provision of Personal Protective Equipment, Detergents, Cleaning Agents and Disinfectants of 15th December 2017 is hereby repealed.
4. This Measure shall be valid and take effect on the date of the Dean's signature.

In Hradec Králové on 13th January 2021

prof. MUDr. Jiří Mand'ák, Ph.D.
Dean of the Faculty
