## Scientific research groups

---

Our most active publishing group comes from graduates of the Master's degree at Masaryk University, who are well equipped in IT skills. It has no special name.

Its core group consists of Mgr. Michal Kuchař, Ph.D. and Mgr. Alexander Morávek, who cooperate with other colleagues of the Institute, the University Hospital, Technical University of Liberec and other departments. Its focus corresponds to topics 1 and 3 above.

RNDr. René Endlicher, Ph.D. is a member of the research group of the Institute of Physiology (see topic 2). Other employees are currently working on partial tasks in cooperation with the clinic of urology, orthopaedics, etc.
