
Department of Obstetrics and Gynecology

The Department of Obstetrics and Gynaecology is accredited by the European Board & College of Obstetrics and Gynecology (EBCOG) for education in gynaecology and obstetrics and by the European Association of Perinatal Medicine (EAPM) for education in perinatology and fetomaternal medicine.

In addition to medical care and research activities, the teaching of - medical students - future doctors and midwives occupies a special place in the life of the clinic.

The obstetric part of the clinic is part of the **perinatology intensive care centre** (one of 12 centres in the Czech Republic), which provides care for the most serious pregnancy complications, including premature births from the 24th week of pregnancy.

The gynaecological part of the clinic includes a **highly specialised centre in oncogynaecology** (one of 17 centres in the Czech Republic), which provides comprehensive diagnostic and therapeutic care for patients with gynaecological malignant tumours.
