## LF HK building in Šimkova Street

Through an interactive 3D model of our largest building, you can see the lecture halls, seminar rooms, the study department and the Dean's office.

By clicking on the image below, you will be taken to the model page where you can enjoy the tour at your own pace and look at the places that interest you most.

The model allows you to navigate and browse seamlessly through each floor (you will also see the descriptions of each department and some rooms here). There are interactive points (coloured pins) with links to videos, photos and useful information on our website.

We have also prepared some interesting places on the bottom bar that you should not miss.

## Building of the Medical Library Na Hradě

In a similar way, you can also take a look at our oldest building, which was part of the castle system of the Přemyslid princes as early as the 10th century and has housed our Medical Library since 1950.

We have prepared some interactive bullet points with videos and links to information for this tour.

If you use the play button in the bottom bar, the model will guide you through the selected rooms automatically. However, you can also use the links (images) to navigate through the rooms in the order that suits you.

## Building of the Educational center at the University Hospital

The third tour will take you to our Teaching Centre at the HK University Hospital. This is a modern building that was built on the FN campus for the purpose of teaching our medics, but it also hosts many conferences, trade shows and meetings.

As in previous models, you are able to walk through selected areas automatically as well as see all the places that interest you, including the changing room or the "connecting tunnel".

You'll also find the deans' bulletin board and paintings by our anatomical artist, Dr. Bavor. Links to the SVOC photo gallery and much more.
