

# eduroam password creation

If you want to use the eduroam network, first you have to create an eduroam password.

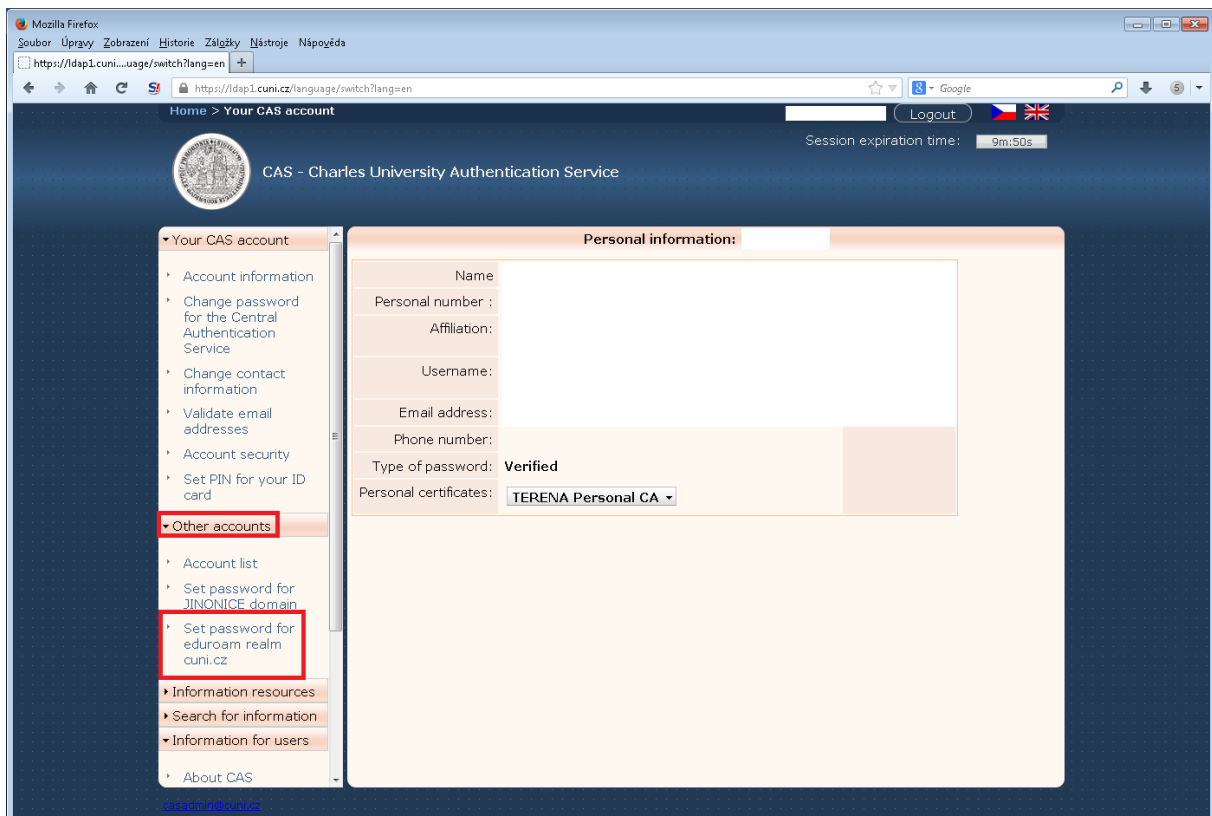

Open the web page of the Faculty of Medicine In Hradec Kralove and click **Password setting** in **Quick links** or just type to your web browser address <https://ldap.cuni.cz>

The screenshot shows the website header with the Faculty of Medicine logo and navigation links. A search bar and language selector (Czech/English) are present. Below the navigation bar, a 'Quick links' menu is displayed with several options: Applicants, Orientation at the faculty, Act. Medical, Medical Library, Staff directory, and Password setting. A red arrow points to the 'Password setting' link.

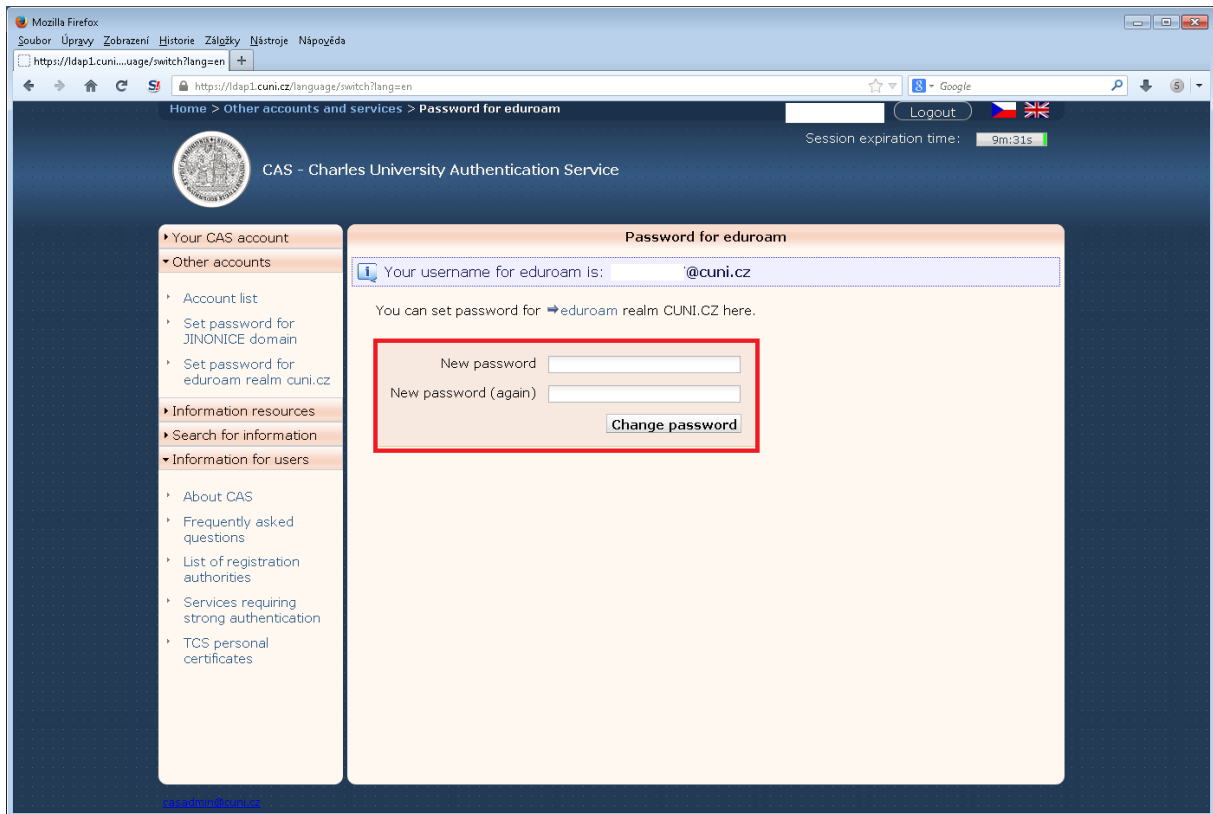

In CAS change portal language to English and log in. As Username it is recommended to use your personal number. You can find it on your ISIC card under your photo. Password is the same as for UK or LFHK services (SIS, e-mail, faculty computers).

The screenshot shows the CAS login page in a Mozilla Firefox browser. The address bar shows the URL <https://ldap1.cuni.cz/language/switch?lang=en>. The page content includes a list of services under the heading 'You wish to:'. The 'Password for CAS' section lists options like changing temporary passwords and resetting forgotten passwords. The 'Other services' section includes managing domain accounts and setting passwords. The 'Information and support' section provides links for more information and solving problems. A login form is visible on the right, with fields for Username (12345678) and Password (masked with dots). A red box highlights the 'Password setting' link in the 'Quick links' menu, and a red arrow points to the 'Login' button. A warning message states: 'After five unsuccessful login attempts the account will be blocked for twenty minutes.'

After successful Login, click **Other accounts** and then click **Set password for eduroam realm cuni.cz**.

Type your new password for eduroam twice. The password has to be different from UK and LFHK password.

If the message of password creation is positive, your password should work now. As username for eduroam use YourPersonalNumber@cuni.cz (for example 12345678@cuni.cz).
